

Women's Coaching Curriculum

WELCOME

Congratulations on taking the first step...

...to add real, life-changing, habit-based nutrition coaching to your business.

With the ProCoach™ technology and curriculum you get the same science-based, road-tested, tried-and-true tools we've used to effectively coach over 45,000 clients to more than 900,000 pounds of weight lost.

Since we, at Precision Nutrition, are scientists and coaches, we're always revising and refining what we do. With this experience, we've figured out what really works when it comes to integrating change psychology, metabolic physiology, and nutrient biochemistry into a program real people can use to get unbeatable results.

With ProCoach you can feel confident knowing your clients will get the most up-to-date, research proven, client-centered coaching available today

WHAT'S IN THIS GUIDE?

We'll summarize:

- our curriculum approach, and why it works
- our entire curriculum, day-by-day, week-by-week
- how skill-building habits and lessons work into the curriculum

WHY A CURRICULUM?

Many people ask us:

You do coaching online? That's, like, an app, right?

Or:

Why would I sign up with you guys when I can get all that information online already?

Or:

How is this different from some of the other habit-based programs?

Here's what we tell them, and what you can tell your own clients.

IT'S MORE THAN JUST AN APP.

We *have* put a lot of time and effort into making clients' online experience as smooth and easy as it can be.

But this is more than just an app. This is technology + skill-building + real coaching.

IT'S MORE THAN JUST INFORMATION.

Sure, there's a ton of information out there. That's the problem.

There's so much information.

It all seems to conflict. It's not organized. And people don't know where to start or what to do with it.

Trying to change your habits and lifestyle with just "information" is like learning to do your own surgery or fly a plane simply by surfing blogs. Not a great idea.

WHY A CURRICULUM?

Plus, in our experience:

People almost never change just because they get “information”.

After all... we all know smoking is bad, getting lots of sleep is good, and we should all wear our seatbelts, right?

So how come everyone isn't a well-rested, seatbelt-wearing nonsmoker?

IT'S MORE THAN JUST HABIT-BASED.

If you've ever tried a habit-based program or app, you've probably quickly gotten stuck with questions:

- Which habits?
- In what order?
- How should you do the habits?
- What if this habit is too hard or easy?
- Why can't you do four habits at once?

And so on.

Habit-based coaching in general is a great start, and it's a great approach.

But it's not a plan.

PROCOACH OFFERS A CURRICULUM.

A curriculum is:

- A set of strategic, logical lessons and activities that go in a particular order, step by step.
- A purposeful program, plan, and progression for client learning, engagement, and development.

A curriculum gives you and your clients:

- **Resources for learning**
- **A “game plan” for action**

IT'S PROGRESSIVE.

Just like any other curriculum (such as learning math), we start at the beginning.

When learning math, students must learn what numbers are, then how to count, then how to add and subtract them, and so on... before they can start doing calculus or algebra.

In the same way, the ProCoach curriculum ensures that clients start in the right place: with the fundamental skills they'll need to get and stay healthy, fit, and active for life.

Secret coaching tip: Even top athletes and clients who think they're “advanced” often need to review and refresh the fundamentals in order to do them consistently. They start at the beginning too, and we ask them to show us that they can do those basics well before they get to move on.

Over time, clients progress. They get better and more confident at doing the skills. They can take on new challenges and consider new possibilities.

Even if your clients eventually become elite performers, with a solid curriculum and learning progression, they'll never lose those basics.

IT'S PRACTICE-BASED.

Like Nike says, just do it.

When it comes to improving health, body composition, or athletic performance, it doesn't matter what you know or what you say.

The only thing that matters is what you do, consistently.

We give our clients some information to help them understand what we ask them to do, and why.

But mostly, we ask them to do stuff. Experiment. Explore. Experience.

Try things. See what works. Get real-time feedback. Practice.

Only action can create change.

IT'S PERSONAL.

Sure, there are general principles, like vegetables, sleep, and exercise are probably good things for most people.

We start with general "best practices". And then we individualize.

Or more accurately, our clients individualize the program for themselves.

- **ProCoach helps clients take responsibility for themselves — their thoughts, their beliefs, their stories, their environments, and most importantly, their behaviors.** (No more coach-blaming or "This diet / workout plan didn't work for me!")
- **ProCoach asks clients to write their Owner's Manual, or "handling instructions for their bodies".** (No more "one-size-fits all" programs.)
- **ProCoach asks them to observe themselves, test hypotheses gather data, and draw conclusions, just like scientists.** (No more blindly "just following the rules".)
- **ProCoach teaches them how to do this, and what to look for.** (No more "I don't know what happened.")

In the end, don't think of the curriculum as a set of interchangeable habits and lessons. It's not that. It's a skill-building self-discovery tool that we created using state-of-the-art psychological and physiological principles.

Of course, no matter how great the curriculum, it can never eliminate the need for your:

- Expert guidance and support
- Help in working through blocks and setbacks
- Collaborative problem solving and goal setting

Yet, ultimately, your clients are responsible for their own progress.

Which means the key to customization is on the client and coaching side, not on the curriculum side.

IT'S AUTOMATED, RELIABLE, AND SCALABLE.

No more “one-off” programs that take time to create for each individual client.

No more wondering and worrying about “Will this work?”

No more adding hours of work and effort as you add more clients.

Whether you have 5 or 50 clients or 500 clients, **ProCoach gives you a consistent, dependable, client-tested system and process.**

It automatically rolls out and progresses your clients seamlessly through what they'll need to know and do, step by step.

That saves you a ton of time and energy — which you can spend enjoying working with your clients instead.

IT'S ABOUT RELATIONSHIPS.

People rarely change with information alone. Even with a good plan (which few people have), there's a missing piece:

You.

The professional.

Research and our experience show: **People are most likely to change when they have strong, supportive relationships.**

For us at PN, that's having our own coaches help deliver the material.

For you, that's connecting meaningfully with your client to guide them through the process.

Having a ready-made curriculum — a clear, strategic, purpose-driven progression through client development and learning — frees you up to do the relationship-building, supporting, guiding, helping, and — above all — coaching that your client needs, wants, and deserves.

Our technology and curriculum plus your coaching equals major client success.

HOW THE CURRICULUM WORKS.

To get the basic idea of how it works, ask yourself:

“If I had a year to change someone’s life and health habits... and I could ‘see’ them every day online... how would I do it?”

The curriculum is approximately a year-long program, divided into 2-week habit blocks.

EVERY DAY

Clients log in to a personal home page (called a “Today” page, because it tells them what to do today).

Clients get a lesson to read.

Clients get a habit — a small task to do.

EVERY WEEK

Clients measure and record their progress. This can be body measurements or other indicators that they want to track (such as energy levels or adherence to an exercise routine).

EVERY 2 WEEKS:

Clients get a new habit to try and practice.

EVERY MONTH:

Clients upload a photo as part of their progress tracking.

THE ENTIRE CURRICULUM OUTLINED.

Want to see the entire curriculum at a glance? here it is:

SOME ADDITIONAL NOTES.

At first glance, the order of the habits might seem a bit random.

However, each habit (or practice) is carefully placed in a particular sequence.

HABITS AND LESSONS ARE CUMULATIVE AND COHERENT.

Each habit / lesson builds the skills for future habits / lessons. Later habits and lessons return to themes and ideas from earlier ones. Everything is connected to everything else in a logical progression.

For instance:

Week 4: Notice and Name lesson (the importance and basic process of self-observation and self-awareness)

leads to:

Week 14: Experiment Day: Snapshot lesson — a very simple self-tracking exercise that looks at a few items throughout the day (energy levels, mental state, mood)

which leads to:

Week 17: Record What You Eat habit

and eventually:

Week 29: Tune Up & Troubleshoot lesson (analyzing patterns in habits)

Week 35: Your Schedule Doesn't Lie lesson (keeping a time diary)

Week 38: Time Bandits, Time Warriors lesson (reviewing time use and what it says about priorities)

And so on.

“ANCHOR HABITS” COME FIRST.

“Anchor habits” are things you can do anytime, anywhere. They’re foundational behaviors.

For example, for fat loss, weight loss, or body recomposition, the two anchor habits are “eat slowly” and “eat to 80% full”. These trump all other habits.

When clients get stuck or overwhelmed with new habits, they can simply return to these “anchor habits”.

CONCRETE, PRACTICAL, PRESCRIPTIVE HABITS COME FIRST.

“Do X in Y way” habits come first.

We tell clients what to do and how to do it for the first several months. This gives them a clear structure and a system, and removes uncertainty.

While clients can still customize all habits to their needs and nutritional levels, early habits focus on clear, unambiguous basics.

Then, we start loosening the reins, allowing more open-ended habits and interpretations of them.

For example:

- **Early, concrete habit:** Eat 5 servings of colorful fruits and vegetables each day
- **Somewhat more open-ended habit midway through:** Use a targeted recovery strategy
- **Completely open-ended habit near the end of the program:** Pay it forward

WE MIX UP “HARD” AND “EASY” HABITS.

Not all clients will struggle with the same habits. However, some habits tend to be harder than others.

We carefully dole out “hard” and “easy” habits so that clients aren’t constantly asked to do difficult things.

WE MIX UP “NEW STUFF” AND “REVIEW / CONSOLIDATION” HABITS.

For example:

Habit: Eat whole foods only (a “stretch” habit, fairly difficult, requires learning new things)

followed by:

Habit: A little more, a little better (relaxing the control, scaling back expectations, allowing client to choose the next actions and simply improve slightly on what is familiar)

SOME HABITS ARE “STRETCH HABITS” OR “EXPERIMENT HABITS” RATHER THAN “FOREVER” HABITS.

Some habits are presented as “things to try” for 2 weeks, rather than “you should always do these as specified, forever”.

For example:

- Eat only / mostly whole foods
- Drink only / mostly calorie-free beverages

The idea here is for clients to:

- Try something that pushes their boundaries for 2 weeks.
- Expand their skills and repertoire while doing so.
- See what they learn and discover about themselves and what they like, need, and/or want through this process of experimenting.
- Add this information and insight to the Owner's Manual.

At the end of the 2 week “play period”:

- Clients decide what was most interesting, valuable, and useful for them.
- They decide what pieces of that habit to keep.

Stretch habits in particular are great opportunities for coaching and collaboration:

- For Level 1 clients, stretch habits simply get them outside their comfort zone, trying new things.
- For Level 2 clients, stretch habits encourage them to “up their game”, improve their execution and/or variety, and refine their skills.

CURRICULUM SUMMARY.

There you have it, the ProCoach curriculum.

It helps to think of it as an evidence-based framework that's standardized, allowing for significant customizing on the client side (and coach side) of the program.

As mentioned, the whole thing is geared toward helping clients do what we call "Build Your Owner's Manual".

Through the habits, lessons, and assignments, we ask the to track their progress, gather data, and reflect on thought exercises.

They do this to write their unique and personal "Owner's Manual" — a collection of information and analysis about their lives, bodies, needs, wants, and real-life-tested experiences.

This process helps them:

- **Take responsibility for themselves** — their thoughts, their beliefs, their stories, their environments, and most importantly, their behaviors. (No more coach-blaming or "This diet / workout plan didn't work for me!")
- **Feel empowered by and invested in the idea that they now have a set of "handling instructions for their bodies"**. (No more "one-size-fits all" programs.)
- **Test hypotheses, gather data, and draw conclusions, just like scientists.** (No more blindly "just following the rules".)

The Owner's Manual empowers them to make informed decisions about their own needs, wants, and priorities (instead of you telling them what to think or feel or do).

It's client-centered coaching at its best.

So don't think of the curriculum as a set of interchangeable habits and lessons. It's not that. It's a skill-building self-discovery tool that we built using state-of-the-art psychological principles.

INTERESTED? JOIN THE PRESALE LIST.

If you're interested and want to find out more,

I'd encourage you to [join our presale list](#).

Being on the presale list gives you two special advantages.

YOU'LL PAY LESS THAN EVERYONE ELSE.

At Precision Nutrition we like to reward the most interested and committed professionals because they've always proven to be our best clients.

Join the presale list to show us you're exactly who we want to work with. And **we'll reward you with 30% off the monthly cost** of Precision Nutrition's ProCoach.

YOU'LL BE MORE LIKELY TO GET A SPOT.

To launch this in a very controlled way we're taking only a small group of fitness and health pros this round. (We probably won't open up additional spots till 2017).

This means we'll sell out within minutes of our June 29th launch. By joining the presale list, **you'll get the opportunity to register 24 hours before everyone else** which will increase your chances of getting in.

So, if you're ready to deliver client-centered nutrition coaching in a reliable, automated and scalable way, this is your chance.

Coach like we coach. Use our system. Help your business grow and thrive.

[Get on the ProCoach presale list today.](#)
